SKILLS

- React
- React Native (CLI)
- Nextjs
- Nodejs
- MongoDB
- HTML
- CSS
- Javascript / Typescript
- Ant design / Material UI / Bootstrap

ACHIEVEMENTS

In my career as a frontend developer I have been able to participate in major projects such as the creation of a mobile app for managing appointments for medical visits, medical product management and subscriptions, this app is called "Roota Two" which is essentially the support of medical visitors, in another opportunity I had the challenge of developing a functional clone of "algolia" by the hand of "meilisearch" that helps to be a powerful search engine and ultimately I am working on "casandra" a very complete ecommerce that has its own job portal and learning academy.

LANGUAGES

Spanish and English.
